Stainless Steel Experience

Bassano del Grappa, 25 / 10 / 2023

Object: Compliance with the law – article 1, paragraph 12) of Council Regulation (EU) 2023/1214 of 23rd June amending Regulation (EU) No. 833/2014 in Article 3g, concerning restrictive measures in consideration of actions from Russia.

Dear Customer,

during the month of June 2023, the European Union adopted the 11th set of sanctions against Russia. In particular, the regulations have introduced and made effective from 30 September 2023, the ban of importing or purchasing, directly or indirectly, the stainless steel products listed in Annex XVII, subjected to processing in a third country incorporating steel products from Russia.

Among these products, there are many categories sold by Tecnica Tre srl.

Even before this regulation, TECNICA TRE has always been committed to maintaining correct control of the entire product supply chain, both for the products imported from third countries as per the products received from the European territory; with particular attention to compliance with the European and national legislation.

TECNICA TRE SRL hereby declares that all the products supplied do not come, either directly or indirectly, from Russia; in compliance with what is established and required by the European Union regulations.

Tecnica Tre also commits to communicate any changes and/or modifications to what is currently declared.

Our quality office remains available for any clarification needs.
